Attached is a flyer

3. New England Fire Rescue EMS Conference & Exposition

The New England Fire Rescue EMS Conference and Exposition will be held Wednesday June 22, through Saturday June 25, 2016 at Foxwoods Resort and Casino. Registration is available on line at www.newenglandfirechiefs.org In conjunction with the Expo The New England Association of Fire Chiefs will host a golf outing at River Ridge Golf Course in Jewett City on Wednesday June 22, 2016 at 10:00 am.

4. Entry Level Firefighter Exam and Interview Prep

Bill Peltz will teach the Firefighter Written Examination Prep course at Norwalk Community College. It consists of 6 weekly two-hour sessions at 7 PM, starting on 6/16/16. The course covers everything from building a resume to acing the interview; every type of test question, including math and mechanical aptitude; and test-taking and score-improving strategies. To register, go to www.norwalk.edu and use the Flexible Registration Link.

5. Public Fire & Life Safety Educator NFPA Mini Lesson Plans

Lesson Plans

Fire and Life Safety Educators are invited to speak at a variety of venues. Careful planning can make the difference between an excellent visit and a mediocre one. While some folks are intimidated by longer sessions, it is the shorter ones that can be the most difficult. A 10 minute mini-lesson is challenging because you need to hook the audience, help them learn new information, and wrap-up in a concise manner. Take a look at our template and lesson samples below, and try to make it work for you the next time you are invited to give a brief presentation.

10-minute mini-lesson plans

The 10-Minute mini-lesson is a helpful strategy life safety educators can implement in a variety of settings. Worship services, gatherings at the local senior center, or service club meetings may all be potential opportunities to deliver short fire safety presentations with specific audiences.

- [Cooking Fires](#) (PDF, 150 KB)
- [Smoke Alarms](#) (PDF, 185 KB)
- [Carbon Monoxide Alarms](#) (PDF, 184 KB)
- [Powerpoint slides](#) (pptx, 351 KB) [Canary sound](#) (wav, 118 KB)

- [Preventing Carbon Monoxide Poisoning](#) (PDF, 155 KB)
- [Calling 9-1-1 from a mobile phone](#) (PDF, 436 KB) – Use this lesson at a team sports event.
- [Hear the Beep Where You Sleep - WHEREVER That May Be!](#) (PDF, 145 KB) - Use this lesson for audiences who may be using less traditional sleeping quarters.
- [Get to Know Smoke Alarms](#) (PDF, 177 KB)
- [Replace Smoke Alarms Every 10 Years](#) (PDF, 117 KB)
- [Home Fire Sprinklers](#) (PDF, 518 KB)

30-minute lesson plan

A 30-minute lesson provides the instructor an opportunity to address information related to fire safety as well as a chance to help participants develop health-enhancing attitudes around the topic. Additional time could also be used to help participants practice new skills. An increase in time does not mean you need to increase the amount of content you are covering. Remember, sometimes depth wins over breadth.

- [Hear the Beep Where You Sleep](#) (PDF, 579 KB)

60-minute lesson plan

60 minutes is a nice chunk of time to provide an effective fire safety lesson. An hour allows the instructor to cover content with depth as well as provide an opportunity for participants to explore helpful attitudes and practice related skills. Remember to engage learners in a different ways keep their attention for the entire lesson.

6. Basic Pump Openings in Newtown

Several openings available for Basic Pumps in Dodgingtown (Newtown) on June 25 and 26. This two day class examines the components and controls in the operation of a fire

pump. Class include specific functions involved in drafting and hydrant operations in setting up for pumping operations. Participants will learn how to determine and overcome friction loss, how to calculate theoretical pump pressure and how to apply easy-to-use "rule of thumb" principles of relay pumping, operating hand lines, supplying sprinklers and standpipe systems. On the training ground, students will apply practical applications while flowing water at prescribed pressures.

Tuition \$90, course number 16255 Link to application
